## Replacement Balloon Gastrostomy Feeding Tubes

The Compat<sup>®</sup> Replacement Balloon Gastrostomy Feeding Tubes are intended for use in patients who require intermittent or continuous enteral administration of nutrition, fluids or medication via a well-established and well healed stoma tract. The tubes may also be used for gastric decompression.

### Features at a glance

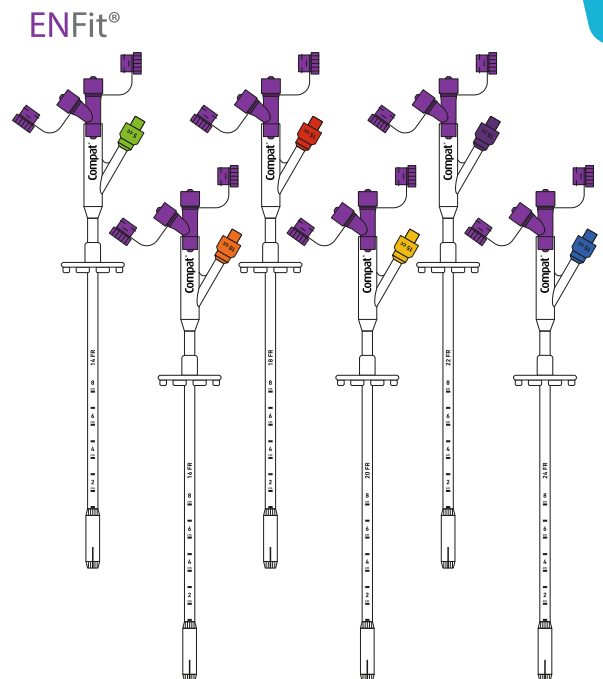

Compat<sup>®</sup> Gastrotube are available in a variety of sizes (14/16/18/20/22/24 FR) and balloon volumes (5, 10 and 15 cc) to meet most patient requirements.

#### Patient Comfort:

- Made of **soft**, transparent and **biocompatible silicone** and feature a **subsumed tip** to be gentle on the stomach wall
- Silicone retention disk with **breathing holes** and **raised feet** allows air to circulate around the stoma site which may promote reduced skin irritation
- **Durable silicone balloon** to encourage up to 90 days of service life and limit tube replacement needs

**Convenience:** Compat<sup>®</sup> Gastrotube feature an integrated ENFit<sup>®</sup> medication port to simplify the administration of medication and are individually blistered in case of 1 piece.

**Patient Safety:** Compat<sup>®</sup> Gastrotube are designed to be **IV incompatible** in order to help promote patient safety and avoid accidental misconnections. All tubes are **DEHP, latex and BPA-free\***.
